STANLEY LEE W.S.

BACKEND TEAM LEAD

(852) 54956654

stanley.lws10@gmail.com

To Kwa Wan, Kowloon

https://stanleylws.github.io

PROFILE

Backend team lead with 7+ years of hands-on engineering experience building scalable web applications and data-driven platforms. Passionate about system design, software architecture, and clean code. Adept at breaking down complex business requirements into reliable, well-engineered solutions.

SKILLS

- C# - ASP.NET
- Python - FastAPI
- JavaScript - React
- Java - SpringBoot
- Dart - Flutter
- SQL - PostgreSQL
- NoSQL - MongoDB
- ORM - SQLAlchemy, Hibernate
- Cloud - Azure, AWS, Firebase
- CI/CD - Github Actions
- Data Science - NumPy, Pandas

EDUCATION

BACHELOR OF ENGINEERING (HONS) MECHANICAL ENGINEERING

Hong Kong Polytechnic University

2015 - 2019

- CGPA 3.84 / 4.0
- First Class Honours
- R&D on UAV Swarm System

EXPERIENCE

BACKEND TEAM LEAD — 2022 - Present

Topo Solutions Limited

- Leading backend development for a low-code/no-code platform focused on supply chain solutions
- Built ETL pipelines to integrate data from various external sources and execute complex data transformations
- Implemented vector search to facilitate semantic querying across platform data, significantly enhancing search relevance for users
- Resolved critical concurrency issues in a distributed environment by implementing locking mechanisms with Redis
- Leveraged DDD principles to design a modular architecture, enabling independent scaling of core services

SENIOR ANALYST PROGRAMMER — 2021 - 2022

IG Inno Limited

- Built a real-time web dashboard for monitoring and managing a fleet of autonomous robots
- Developed a cross-platform mobile app for remote robot control and live status monitoring

ANALYST PROGRAMMER — 2019 - 2021

SquareDog Robotics

- Developed and optimized path planning and positioning control algorithms for robot navigation
- Integrated software modules with robotic hardware components to deliver comprehensive, end-to-end autonomous solutions
